RE: Project 51812 -
ISSUES RELATED TO THE STATE OF DISASTER FOR THE FEBRUARY 2021 WINTER WEATHER EVENT

To the members of the PUCT:

As residential electric customers in Texas who are still facing financial uncertainty – on top of having experienced extended power outages – due to the extraordinary failures of the Texas electric grid during the recent winter storm, we ask you to protect Texas consumers from further burdensome repercussions of those failures by capping ancillary electric costs at no more than \$9,000 per MWh at your Friday meeting, March 5.

Respectfully submitted,

Michael & Patricia Dorsey
